

RECYCLING INTERN OPPORTUNITY

The Community Technology Project
205 Amesbury Avenue, London, SW2 3BJ
0208 6715555 / 0207 7333334
<http://comm-tech.org/>

About us

Community Technology supports organisations in the Charitable and Voluntary sector by the provision of Technical Support, Equipment maintenance and by supporting Open Source Software.

A non-profit organisation with a strong ethical basis to its work, Community Technology also promotes the re-use and recycling of equipment and endeavours to minimise the environmental impact of IT waste.

In Addition to the above operations, Community Technology offers a recycling service collecting redundant IT Equipment as a licensed WEEE (Waste Electrical and Electronic Equipment) handler. This is the area you would contribute to directly.

About you

- You would have a good knowledge of recycling and what can be reclaimed from IT equipment that is no longer usable.
- You will have a reasonably good good written English.
- You are able to work on your own initiative to complete a task given an outline.
- Above all you will need a desire to contribute to what Comm-Tech are doing.
- You are aware of the growing technological divide and subscribe to the ethical aims of Community Technology stated above.
- You have 2 to 5 days per week spare and are able to commit at least 6 months to working with us.

The Benefits

This is a voluntary opportunity that will give successful applicants hands on work experience of servicing a client centred environment dealing with a wide variety of tasks and issues.

What Next

If you are interested in joining Community Technology then please contact us and ask for an application pack. (Contact details above.)

NOTE: Comm-tech is not a school or college, we are not able to assist with work permits, visa applications, accommodation or travel expenses from ex-London.
